Name \_\_\_\_\_ # \_\_\_\_\_ Date \_\_\_\_\_

Today my school had an assembly. When it was 9:05, and my class got out with their towel in wonder.

The announcer welcomed my class to sit on the floor. He said, "Do not scare my friend that is going to see." He pulled the truck opening and there was a cow! It was a female named Buttercup. He announced, "Buttercup is one of the group that makes lot of milk. She was a dairy cow, that is black and white. She is called a Holstein. Buttercup eats Alfalfa hay. Holstein produces the most milk of all breeds. She has an number tag on her ear and the farmers initials of her body. She has four compartments in her body. Buttercup had two babies. She was 3 years old.

Benny was small and fluffy, brown. When Benny grows up he will become a bull. He was very cute and furry. It was 2 years old. The group he was in was called a Jersey. Their milk had the richest cream. He has four compartments in his stomach too.

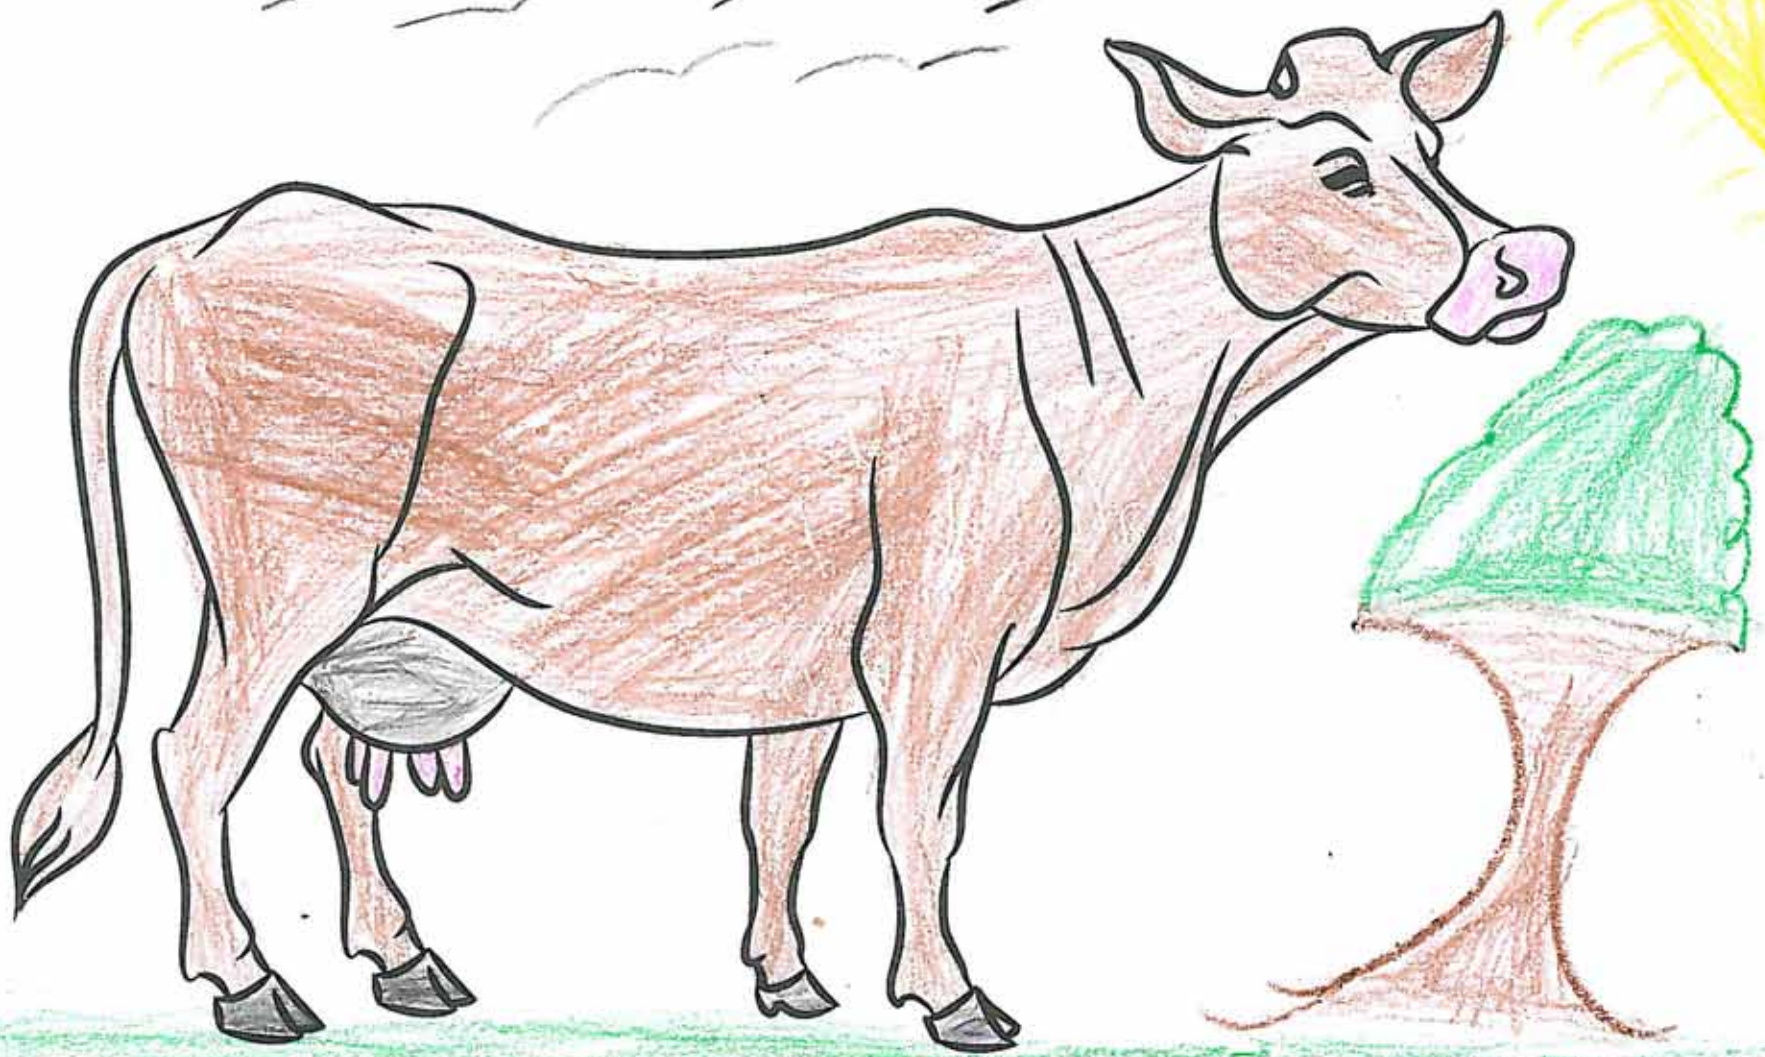

Cow have teat Cow have milk in Cow teat Cow have

nose to smell Cow eat hay to stay
