

Cows came to America with Christopher Columbus.
A cow has four stomachs. Down, up, round and round.
Cows eat veggies, grains, and alpha hay. They drink water.

Thank you for teaching me where the
udder is! I really appreciate it!

P.S. can you visit my school next year?

A cow has four stamicks on there body,
And the people milks the cows three times,
Also it eats carrets and heys on the ground.

I learned that the cow has four stomiks.
It eats carrots, artichokes, grain, and drinks
water. They live in farms and fields.

EASTER COW

I Love
EASTER!
Mooooo

A cow has four stomachs. Cows eat grain during
drinking milk
